Radiology: Cardiothoracic Imaging

Held to the same high editorial standards found in all RSNA journals, *Radiology: Cardiothoracic Imaging* emphasizes research advances and technical developments in medical imaging that drive cardiothoracic medicine.

Published bi-monthly, *Radiology: Cardiothoracic Imaging* is available exclusively online.

RSNA Journals™

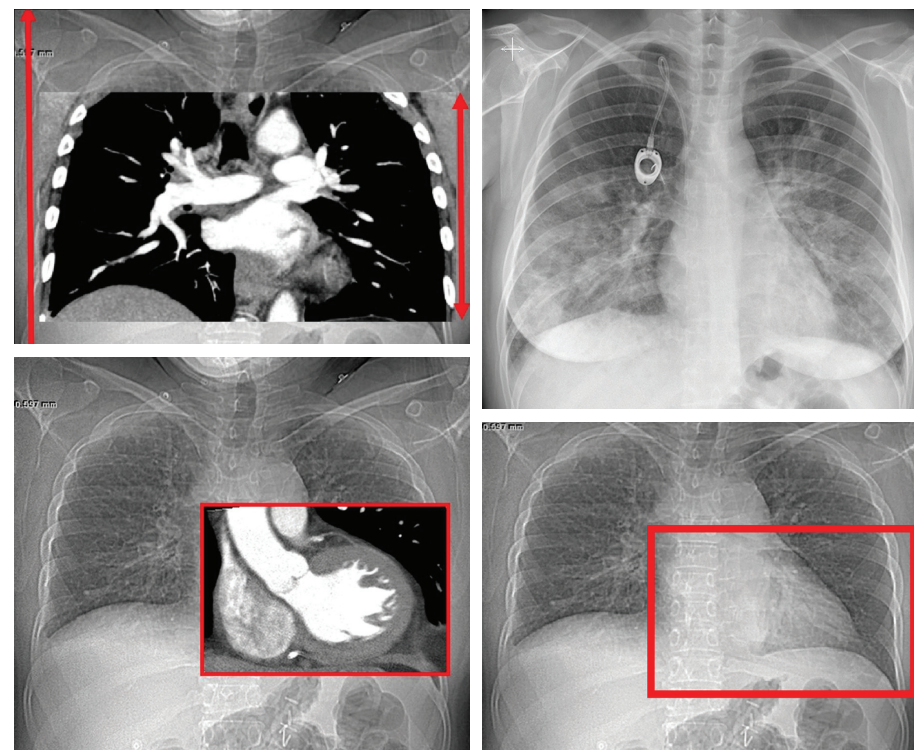

Radiology: Cardiothoracic Imaging

Meet the Editor

Suhny Abbara, MD, FACR, FSCCT

Dr. Abbara is professor of radiology, chief of the Cardiothoracic Imaging Division, chair of CT Operations, and Texas Medical Board Accredited Program director for the Cardiothoracic Imaging Fellowship at University of Texas Southwestern Medical Center in Dallas. In 2017, Dr. Abbara was the recipient of the RSNA Honored Educator Award and was listed among America's Top Doctors by Castle Connolly in 2016 and 2017. He currently serves as an attending physician at Zale Lipshy University Hospital, Clements University Hospital and Parkland Health & Hospital System, where he is the medical director of Parkland Cardiothoracic.

“I was thrilled when I learned that RSNA was creating the new journal, Radiology: Cardiothoracic Imaging,” Dr. Abbara said. “The next 10 years in cardiothoracic imaging will be very different from the last 10. This new journal can serve as a catalyst for the science and research that drive this positive change, and I am convinced that it can aid in the translation of research into clinical practice. I am honored to be able to serve as editor for this timely new journal.”

“Suhny Abbara brings a wealth of cardiac expertise and years of dedicated service as an RSNA volunteer to his new position as editor,” said Mary C. Mahoney, MD, RSNA Board liaison for publications and communications. “The RSNA Board looks forward to his stewardship of Radiology: Cardiothoracic Imaging.”

Submit Your Manuscript Today!

The journal will cover all aspects of diagnostic imaging and imaging-guided therapy in the fields of cardiac imaging. It will offer special emphasis on cardiac CT and MRI, vascular imaging, and pulmonary/thoracic imaging, including cardiac gated and non-gated CT and MRI, CTA, MRA, PET, US and echocardiography and more.

The journal's scope ranges from technology development and assessment to cost-effectiveness, epidemiology and outcomes research.

Visit RSNA.org/Cardiothoracic-Imaging to submit your materials now to be among the first published in this important new journal.
