

Sociology Collection on ProQuest – the basics

DANIELA CASON

October 2022

ProQuest®

Part of Clarivate

Learning Objectives

During this session you will learn how to:

- Use the collection components based on their content strengths
- Build and run effective simple searches using the basic search features
- Review the results, use the refining tools, display results online or save them offline

Content description

Sociology Collection

- ProQuest's renowned, proprietary A&I databases combined with full text files
- Provides researchers with the best value and broad mix of content to support interdisciplinary needs
- Gives the users one place to start their research and allows them to drill down to specific subject files.

Sociology Collection

Enter search terms...

Full text Peer reviewed Exclude Wire Feeds [Search tips](#)

This collection provides access to Sociological Abstracts in combination with other databases covering the international literature in sociology and social services, along with related fields. Together, it provides abstracts, indexing and full-text coverage of journal articles, books, book chapters, dissertations, working papers, and more, including full-text from hundreds of leading sociology journals.

Sociology Collection - Overview

Sociology collection - international literature in sociology and social services, and related fields. Abstracts, indexing and full-text coverage of journal articles, books, book chapters, dissertations, working papers, and more, including full-text from hundreds of leading sociology journals.

Applied Social Sciences Index & Abstracts (ASSIA) - serves information needs of caring professions, practitioners, researchers, and students in healthcare, social services, education, and related areas. Core of 500 most relevant English language scholarly journals on health and social care.

Sociological Abstracts + Social Services Abstracts - international literature of sociology, social work, and related disciplines in the social and behavioral sciences.

Sociology Database - international literature of sociology and social work, + related fields: social policy, social care, social services, social anthropology, gender studies, gerontology, social psychology and population studies. Hundreds of full-text scholarly journals, dissertations and other sources.

Subject Coverage

ASSIA

- Education
- Family
- Gerontology
- Health services
- Housing
- Mental health services
- Nursing
- Social work
- Substance abuse

Sociological Abstracts

- Addiction
- Community and mental health services
- Family and marriage
- Gerontology
- Race and ethnicity
- Social care
- Social policy
- Social services
- Social structure
- Social welfare
- Social work
- Sociology

Social Services Abs

- Community and mental health services
- Crisis intervention
- The family and social welfare
- Gerontology
- Poverty and homelessness
- Professional issues in social work
- Social services in addiction
- Social work education
- Social work practice
- Violence, abuse, neglect

Global Coverage

- Serves research across regions and markets
- Active full text titles from 50+ countries featuring 30+ languages, with abstract & indexing coverage of many more
- ~ 4 million records
- Over 1500 publications full text
- 600+ content partners
- Includes renowned index databases with international remit such as ASSIA and Sociological Abstracts

Language	Count ▼
English	3,600,981

Phrase Searching

The image shows two screenshots of the Applied Social Sciences Index & Abstracts (ASSIA) search interface. The top screenshot shows a search for "childbirth education" resulting in 5,267 results. A blue arrow points down to the second screenshot, which shows the same search interface but with the search term enclosed in double quotes: "childbirth education", resulting in 788 results. The interface includes a dark teal header with the title "Applied Social Sciences Index & Abstracts (ASSIA)", navigation links for "Basic Search", "Advanced Search", and "Change databases", and a search input field.

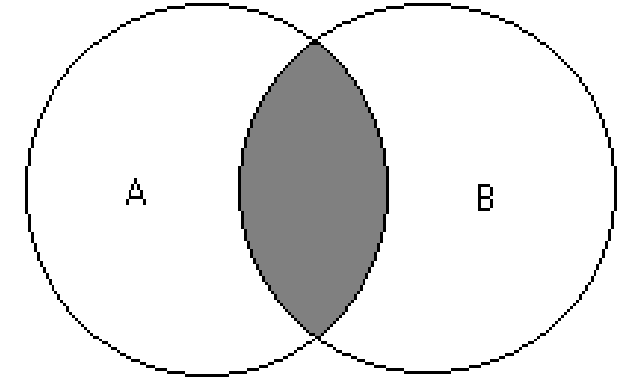

Space between terms = AND
"double quotes" search the exact phrase and also deactivate the automatic retrieval of word variants

Boolean Operators summary

AND - All the words **MUST** be present.

Focus results

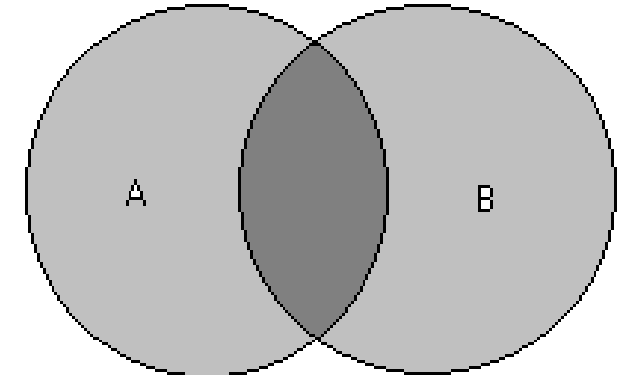

RADIATION **AND** CHERNOBYL **AND** CHILDREN

OR - Any of the words **CAN** be present.

Enhance results

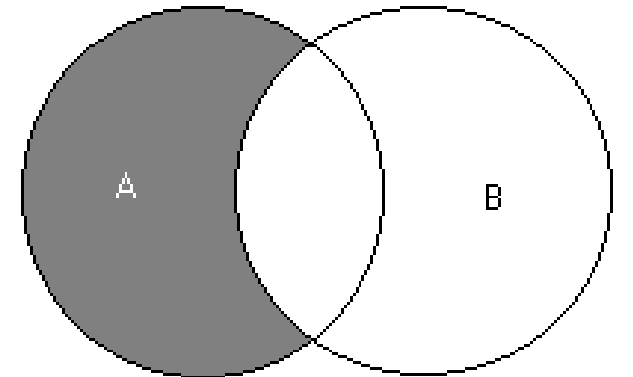

UNIVERSITY **OR** COLLEGE **OR** "HIGHER EDUCATION"

NOT - The first word is present,
excluded the word following **NOT**.

Focus results

MERCURY **NOT** PLANET

Other tools

Operator	Description	Example
PRE NEAR P/# N/#	<p>Proximity Operators - when used alone, retrieve the search terms if separated by maximum 4 intervening words. Adding a number after the slash / changes the default nr of 4 words to less or more.</p> <p>PRE keeps the exact order of the terms NEAR retrieves the terms in any order</p>	<p>CANCER NEAR/2 RESEARCH Finds: Research on Cancer, Cancer defeated by Research</p> <p>SKIN PRE/0 CANCER Finds: skin cancer but not Cancer of the skin</p>
*	<p>Truncation character (*) - retrieves variations of the search term. Use the truncation character at the end (right-hand truncation) or in the middle of search terms. Each truncated word can return up to 500 word variations.</p> <p>Standard truncation (*) retrieves variations on the search term, replacing up to 5 characters.</p>	<p>farm* Finds: farm (farms) farmer, farming</p>
[*n]	<p>Defined truncation [*n] is used to denote up to how many characters you want to truncate. It replaces up to the number of characters specified, for example [*7]. The maximum number of characters that can be entered is 20.</p>	<p>nutr[*10] Finds: nutrition, nutrient, nutrients, nutraceuticals, nutraceuticals</p>

Truncation: Using *

Applied Social Sciences Index & Abstracts (ASSIA)

Order of Execution

1. AND
2. OR
3. NOT

ProQuest follows a **default order** when interpreting a search that uses operators to combine search terms.

dog OR cat AND food OR nutrition

Without brackets by default it is searched as if it was

(cat AND food) OR dog OR nutrition

Use parentheses to override the default order of processing

(dog or cat) AND (food or nutrition)

Basic search

Expand your keywords on your research topic to enhance both accuracy and comprehensiveness, e.g.
((peri OR ante OR anti OR "pre") n/1 natal OR prenatal OR perinatal OR ant?natal OR childbirth) AND (educat OR class* OR course OR interaction OR intervention OR lecture* OR program* OR series OR session OR talk OR therap* OR train*)*

The screenshot shows the ProQuest interface for a search in the Sociology Collection. The search bar contains the query: `(prenatal OR ant?natal OR childbirth OR perinatal OR (peri OR ante OR ANTI OR "pre") n/1 natal) AND (educat* OR class* OR course OR interaction OR intervention OR lecture* OR program* OR series OR session OR talk OR therap* OR train*)`. The search results are 43,139, with 1,294 results displayed. The applied filters include: 2010-2029, United Kingdom-UK, England, Scotland, Northern Ireland, Wales, and Ireland. A red arrow points from a text box to the word "session" in the search query.

Abstract

[Translate](#) ▾

Background Learned resourcefulness plays a significant role in facilitating **maternal** coping during the transition to **motherhood**. Given the growing evidence of **perinatal** depression and the frequent feeling of incompetence in the **maternal** role, the implementation of an effective **intervention** to promote **maternal** role competence and emotional well-being is essential. Objectives To determine the impact of a **childbirth** psychoeducation **program** based on the concept of learned resourcefulness on **maternal** role competence and depressive symptoms in Chinese childbearing women. Design A pretest-posttest, control group quasi-experimental design with repeated measures was used. Setting The study was conducted in two regional public hospitals in Hong Kong that provide routine **childbirth education programs** with similar content and structure. One hospital was being randomly selected as the experimental hospital. Participants A convenience sample of 184 Chinese pregnant women attending the **childbirth education** was recruited between October 2005 and April 2007. Inclusion criteria were primiparous with singleton and uneventful pregnancy, at gestation between 12 and 35 weeks, and did not have a past or familial psychiatric illness. Methods The **intervention** was a **childbirth** psychoeducation **program** that was incorporated into the routine **childbirth education** in the experimental hospital. The experimental group (n = 92) received the **childbirth** psychoeducation **program** and the routine **childbirth**

Background Learned resourcefulness plays a significant role in facilitating **maternal** coping during the transition to **motherhood**. Given the growing evidence of **perinatal** depression and the frequent feeling of incompetence in the **maternal** role, the implementation of an effective **intervention** to promote **maternal** role competence and emotional well-being is essential. Objectives To determine the impact of a **childbirth** psychoeducation **program** based on the concept of learned resourcefulness on **maternal** role competence and depressive symptoms in Chinese childbearing women. Design A pretest-posttest, control group quasi-experimental design with repeated measures was used. Setting The study was conducted in two regional public hospitals in Hong Kong that provide routine **childbirth education programs** with similar content and structure. One hospital was being randomly selected as the experimental hospital. Participants A convenience sample of 184 Chinese pregnant women attending the **childbirth education** was recruited between October 2005 and April 2007. Inclusion criteria were primiparous with singleton and uneventful pregnancy, at gestation between 12 and 35 weeks, and did not have a past or familial psychiatric illness. Methods The **intervention** was a **childbirth** psychoeducation **program** that was incorporated into the routine **childbirth education** in the experimental hospital. The experimental group (n = 92) received the **childbirth** psychoeducation **program** and the routine **childbirth**

Learning Objectives Summary

During this session you have learned how to:

- Use the collection components based on their content strengths
- Build and run effective simple searches using on the basic search features
- Review the results, use the refining tools, display results online or save them offline
